

Secured data management & Transmission

The goal of this project is to design a system able to securely manage and transfer data between MCC and the base.

Laboratory:	TBD
Number of students:	1 (Master)
Section:	IN, SC
Status:	Available

Description of the project

The student would have to design a system that allows for the management of different kind of information:

- Personal/private information;
- Crucial/nonpublic information;
- Crucial/public information.

Focus should be put on data integrity and these different levels of privacy.
