

APP EVA

The goal of this project is to develop an application that would be used by astronauts during EVA (Extra-Vehicular Activities)

Laboratory: TBD
Number of students: 1 (Bachelor)
Section: IN, SC
Status: Taken (Fall 2020)

Description of the project

This project aims at developing an application that would help astronauts during EVAs. It should allow them to check instructions, their tool list, but also communicate both with the base and with the members of their team.

Description of the student's work and mission

Prior to designing the app, the student would have to identify the needs of the astronauts during EVAs.
