

Astrolink I

The goal of this project is to develop a software for the Mission Control Center to communicate with the astronauts, and store the data necessary for the mission

Laboratory: LCA2
Number of students: 2 (Master)
Section: IN, SC
Status: Taken (Fall 2020)

Description of the project

The goal of this project would be to develop a software for the Mission Control Center (MCC), which would contain everything we need during the mission: flight plans, procedures, communications between the different members of Mission Control as well as with the analog base.
