

Tower Power Source

The goal of this project is to develop a power source for a tower realizing atmospheric measurements.

Laboratory: TBD

Number of students: 1 (Master)

Section: EL, MT, MX, SIE

Status: Available (Spring 2021)

Description of the project

The goal of this project would be to find innovative solutions to power a tower that will be used for atmospheric measurements. The student would have to work in close contact with other students working on the design and manufacturing of the tower.
