

Water potability test

The goal of this project would be to develop a test to assess the potability of water drunk by the astronauts.

Laboratory: TBD

Number of students: 1 (Master)

Section: CGC, SIE

Status: Available (Spring 2021)

Description of the student's work and missions

- Creating a mapping of the substances potentially dangerous that could arise from the water recycling process used during space missions;
- Developing a test to identify one of them;
- Training the astronauts to use the test.
